Celestica
Toronto, ON

Re: Student Intern, Operations Technology & AI Solutions

Dear Hiring Team,

I am writing to apply for the Student Intern, Operations Technology & AI Solutions position at Celestica. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to apply AI to real operations technology at a global manufacturing scale.

As Systems Analyst Intern with the City of Merritt, I managed 163 IT tickets spanning operations and systems support, and built a full CityWide REST API runbook through hands-on curl and PowerShell testing.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including model integration and diagnosing a Stripe webhook idempotency defect.

I would welcome the opportunity to discuss how my operations technology and AI experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
