Hiring Team
Acturis Canada
Victoria, BC

Re: Technical Business Analyst Co-op (Winter 2027)

Dear Hiring Team,

I am writing to apply for the Technical Business Analyst Co-op at Acturis Canada in Victoria. Gathering client requirements, specifying insurance product configurations, and checking that the build meets the specification is analysis work that rewards both technical depth and careful communication.

As a Systems Analyst co-op at the City of Merritt, I translate staff requests into concrete system changes across 163 IT tickets and 87 onboarding and offboarding requests. I wrote a CityWide REST API runbook by testing every step myself, documenting authentication, constraints, and workflows so the process could be repeated accurately.

As co-founder of BecomeAfish and InferenceSaver, I gather requirements from customers and partners and implement them myself in code, including pricing, payments, and rules-driven workflows. That experience makes me precise when writing specifications, because I know which details a build team needs and which edge cases break configurations.

I am comfortable with Excel, programming, and structured problem-solving, and I am keen to learn the Acturis platform and the Canadian insurance domain. Thank you for considering my application.

Sincerely,

Mandeep Singh
