CGI
Toronto, ON

Re: Winter 2027: AI Developer Co-op (8 months)

Dear Hiring Team,

I am writing to apply for CGI's Winter 2027 AI Developer Co-op in Toronto. Building AI solutions that hold up in client environments, where reliability, security, and clear documentation matter as much as model capability, is the kind of work I want to grow in.

At InferenceSaver, I co-founded a production AI gateway and multimodal generation platform that reached 2.7K active site users and 43K tracked events in 2026. I built model integrations, authentication, billing, and backend workflows, and I fixed a payment idempotency defect affecting live transactions with retry-safe writes.

I contribute to AgentMemory, an open-source memory layer for AI coding agents with 29.7K+ GitHub stars, and co-built Log by ListeningKit at the Convex Hackathon, contributing 70+ commits across APIs, MCP tooling, and AI intent scoring. These projects gave me practical experience with retrieval, agent tooling, and shipping AI features quickly as part of a team.

My City of Merritt co-op adds enterprise context: identity and access management, Microsoft 365, and API documentation for municipal systems. I would welcome the opportunity to bring this mix of AI engineering and client-minded delivery to CGI. Thank you for considering my application.

Sincerely,

Mandeep Singh
