Re: Business Systems Analyst Co-op (Winter 2027), Enterprise Technology & Business Management

Dear Hiring Team,

I am writing to apply for the Business Systems Analyst Co-op in CIBC's Enterprise Technology & Business Management group. Turning business needs into clear requirements and solution designs is the core of my current role, and I would like to apply it to large-scale projects on CIBC's architecture roadmap.

As a Systems Analyst co-op at the City of Merritt, I have managed 163 IT tickets and 87 onboarding and offboarding requests that span accounts, permissions, and equipment. I also produced a CityWide REST API runbook by testing the API directly with curl and PowerShell, documenting authentication, constraints, and the end-to-end onboarding workflow so others could rely on it.

On the delivery side, I co-founded BecomeAfish and InferenceSaver, where I gathered requirements from instructors, customers, and partners and turned them into role-based portals, payment flows, and eight automated workflows. Building the systems myself means my requirements are grounded in what is technically realistic.

I communicate clearly in writing and in person, and I enjoy the relationship-building side of analysis. I would welcome the opportunity to support CIBC's digital transformation this winter. Thank you for considering my application.

Sincerely,

Mandeep Singh
