Hiring Team
CIBC
Toronto, ON

Re: Data Analyst Co-op

Dear Hiring Team,

I am writing to apply for the Data Analyst Co-op with CIBC's Borrowing Solutions team. Analyzing strategy performance, recommending improvements from the data, and automating manual processes is work I already do across the products I run.

At BecomeAfish, I built campaign attribution and analytics that tracked 4,967 page views over 61 days, and I use that data to decide where marketing and product effort should go. I also automated eight operational workflows covering payroll batching, reconciliation, and notifications, replacing manual spreadsheet work with reliable scheduled jobs on PostgreSQL.

At InferenceSaver, I monitor 43K tracked events and payment data to understand customer behaviour, and I traced a payment defect affecting 8 of 14 checkouts by reconciling transaction records against application state. I bring Python and SQL, and I am comfortable picking up Tableau, Power BI, Alteryx, or SAS quickly given my analytics and data-pipeline background from Generic Alternatives.

My City of Merritt co-op has taught me to document processes clearly and communicate findings to non-technical colleagues. I would welcome the opportunity to contribute to CIBC's segmentation strategy work. Thank you for considering my application.

Sincerely,

Mandeep Singh
