Hiring Team
Mikata Health
Calgary, AB

Re: AI Project Implementation Intern

Dear Hiring Team,

I am writing to apply for the AI Project Implementation Intern position at Mikata Health. Helping clinicians and staff adopt an AI scribe like Mika, and improving internal processes with AI and automation, sits right where my technical and people-facing experience meet.

As a Systems Analyst co-op at the City of Merritt, I support staff through 163 IT tickets and 87 onboarding and offboarding requests, which is change management in practice: introducing new tools, writing clear documentation, and handling access and data carefully. I also authored a REST API runbook so colleagues could repeat a complex workflow without me.

On the AI side, I co-founded InferenceSaver, a production platform integrating language and voice models, and co-built Log by ListeningKit at the Convex Hackathon, contributing AI intent scoring, analytics, and onboarding flows. At BecomeAfish, I automated eight workflows and tracked metrics to confirm they saved real time.

I am careful about privacy and security standards, and I enjoy designing training material that helps people trust new tools. I would welcome the opportunity to support Mikata's implementation team in Calgary. Thank you for considering my application.

Sincerely,

Mandeep Singh
