Summary

Third-year Computing Science co-op student who implements AI tools and automation inside real organizations, with enterprise IT support, process documentation, and privacy-conscious change management experience. Seeking Mikata Health's AI Project Implementation Internship.

Education

Thompson Rivers University — Kamloops, BC

Bachelor of Computing Science (Co-op Program) — *2023 – Present*

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

Experience

Systems Analyst Intern — June 2026 – Present

City of Merritt — *Merritt, BC*

- Managed **163 assigned IT tickets**, with **135 completed**, spanning Windows troubleshooting, application support, access management and hardware
- Handled **87 onboarding/offboarding-related tickets** covering employee accounts, permissions and equipment provisioning and collection
- Developed a **CityWide REST API runbook** through curl and PowerShell testing, documenting authentication, API constraints and onboarding/offboarding workflows

Co-Founder & Software Engineer — July 2025 – Present

InferenceSaver — *Next.js, React, TypeScript, Convex, Stripe*

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **$5.6K+ in confirmed platform credit allocations across 60 top-ups**
- Diagnosed a Stripe idempotency defect affecting **8 of 14 completed checkouts**, implemented retry-safe payment writes, and restored music/voice integrations used for **88 production generation jobs**

Co-Founder & Technical Lead — March 2026 – Present

BecomeAfish — *Next.js, TypeScript, PostgreSQL, Stripe*

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD $5K within about two months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **8 workflows** covering payroll batching, reconciliation, and notifications

Projects

Log by ListeningKit — GitHub | Live

Co-Founder & Software Engineer — *Next.js, TypeScript, Convex, Vercel*

- Contributed 70+ commits across APIs, MCP tooling, AI intent scoring, browser integrations, authentication, analytics, and production fixes
- Co-founded and shipped Log for the Convex Hackathon; drew 402 visitors and 1,004 page views in 30 days, plus 25 GitHub stars and 6 forks

Preflight — GitHub | Live

Hackathon Developer — *Next.js, TypeScript, Amazon Nova, Playwright*

- Built a multimodal launch scanner combining source-code context, DOM audits, and responsive screenshots
- Used Amazon Nova models to identify visual, routing, and performance issues and produce remediation checklists

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS
Frameworks: Next.js, React, Node.js, Prisma
Backend & Data: Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication
Cloud & Development: Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs
Platforms & Integrations: Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4
IT Systems: Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
