Re: Software Developer Intern - Android (May 2027 - 12 Months)

Dear Hiring Team,

I am writing to apply for the 12-month Software Developer Intern - Android position at SOTI. Building the agent apps that make enterprise mobility management work on real devices connects my software development with my day-to-day IT work.

At the City of Merritt, I deploy and manage devices, enforce BitLocker, and resolve access issues across 163 IT tickets and 87 onboarding and offboarding requests. I see the device-management side of SOTI's customers every day, including what makes enrolment and policy changes painless for administrators and users.

As a developer, I built BecomeAfish's customer-facing booking platform used by 108 accounts, and Brainrot, an Electron desktop app where a background process communicates with an interactive HUD through IPC, which is a pattern close to the service-and-UI split in Android agent apps. I also built SyntaxArk, a browser IDE with real-time collaboration. I write Java with solid data-structure and database fundamentals, and I am eager to build in Kotlin and the Android SDK.

I would welcome the opportunity to grow as a mobile developer on SOTI's Android team over a 12-month term. Thank you for considering my application.

Sincerely,

Mandeep Singh
