Summary

Third-year Computing Science co-op student who builds web products people use, in TypeScript, React, and Next.js, with AI integrated into both the products and the development process. Seeking TELUS Digital's Summer 2027 Software Engineering Internship in Vancouver.

Education

Thompson Rivers University Kamloops, BC

Bachelor of Computing Science (Co-op Program) *2023 – Present*

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

Experience

Co-Founder & Technical Lead March 2026 – Present

BecomeAfish *Next.js, TypeScript, PostgreSQL, Stripe*

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD $5K within about two months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **8 workflows** covering payroll batching, reconciliation, and notifications
- Built campaign attribution, AI-assisted blog/newsletter automation, social publishing integrations, and technical SEO tooling; implemented analytics tracking **4,967 pageviews over 61 days**

Co-Founder & Software Engineer July 2025 – Present

InferenceSaver *Next.js, React, TypeScript, Convex, Stripe*

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **$5.6K+ in confirmed platform credit allocations across 60 top-ups**
- Diagnosed a Stripe idempotency defect affecting **8 of 14 completed checkouts**, implemented retry-safe payment writes, and restored music/voice integrations used for **88 production generation jobs**

Systems Analyst Intern June 2026 – Present

City of Merritt *Merritt, BC*

- Managed **163 assigned IT tickets**, with **135 completed**, spanning Windows troubleshooting, application support, access management and hardware
- Handled **87 onboarding/offboarding-related tickets** covering employee accounts, permissions and equipment provisioning and collection

Projects

SyntaxArk GitHub | Live

Open-Source Developer *React, TypeScript, Monaco Editor, xterm.js*

- Built a browser-based IDE with multi-file editing, terminal integration, isolated execution, and real-time collaboration
- Designed scalable client state and backend data models for projects, files, presence, and shared sessions

Log by ListeningKit GitHub | Live

Co-Founder & Software Engineer *Next.js, TypeScript, Convex, Vercel*

- Contributed 70+ commits across APIs, MCP tooling, AI intent scoring, browser integrations, authentication, analytics, and production fixes
- Co-founded and shipped Log for the Convex Hackathon; drew 402 visitors and 1,004 page views in 30 days, plus 25 GitHub stars and 6 forks

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS
Frameworks: Next.js, React, Node.js, Prisma
Backend & Data: Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication
Cloud & Development: Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs
Platforms & Integrations: Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4
IT Systems: Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
