Summary

Third-year Computing Science co-op student who builds browser test automation with Playwright, TypeScript, and Python, plus CI/CD, REST and WebSocket-style real-time systems. Seeking Applanix's 16-month Automated Test Engineering Internship beginning May 2027.

Education

Thompson Rivers University Kamloops, BC

Bachelor of Computing Science (Co-op Program) *2023 – Present*

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

Experience

Co-Founder & Software Engineer July 2025 – Present

InferenceSaver *Next.js, React, TypeScript, Convex, Stripe*

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **$5.6K+ in confirmed platform credit allocations across 60 top-ups**
- Diagnosed a Stripe idempotency defect affecting **8 of 14 completed checkouts**, implemented retry-safe payment writes, and restored music/voice integrations used for **88 production generation jobs**

Co-Founder & Technical Lead March 2026 – Present

BecomeAfish *Next.js, TypeScript, PostgreSQL, Stripe*

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD $5K within about two months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **8 workflows** covering payroll batching, reconciliation, and notifications
- Built campaign attribution, AI-assisted blog/newsletter automation, social publishing integrations, and technical SEO tooling; implemented analytics tracking **4,967 pageviews over 61 days**

Systems Analyst Intern June 2026 – Present

City of Merritt *Merritt, BC*

- Managed **163 assigned IT tickets**, with **135 completed**, spanning Windows troubleshooting, application support, access management and hardware
- Handled **87 onboarding/offboarding-related tickets** covering employee accounts, permissions and equipment provisioning and collection

Projects

Preflight GitHub | Live

Hackathon Developer *Next.js, TypeScript, Amazon Nova, Playwright*

- Built a multimodal launch scanner combining source-code context, DOM audits, and responsive screenshots
- Used Amazon Nova models to identify visual, routing, and performance issues and produce remediation checklists

SyntaxArk GitHub | Live

Open-Source Developer *React, TypeScript, Monaco Editor, xterm.js*

- Built a browser-based IDE with multi-file editing, terminal integration, isolated execution, and real-time collaboration
- Designed scalable client state and backend data models for projects, files, presence, and shared sessions

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS
Frameworks: Next.js, React, Node.js, Prisma
Backend & Data: Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication
Cloud & Development: Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs
Platforms & Integrations: Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4
IT Systems: Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
