Hiring Team
CIBC (Mainframe Support)
Toronto, ON

Re: Mainframe Support, Winter 2027 Co-op

Dear Hiring Team,

I am writing to apply for CIBC's Mainframe Support Winter 2027 Co-op. I am drawn to the opportunity to support critical banking environments while learning mainframe and database operations from an experienced enterprise technology team.

At the City of Merritt, I have managed 163 assigned IT tickets across application support, identity, hardware, and Windows environments and built a tested REST API runbook in curl and PowerShell. The role has taught me to make controlled changes, document clearly, and keep operational needs at the centre of technical work.

At BecomeAfish and InferenceSaver, I built database-backed production systems and automation workflows and resolved failures affecting real transactions. I would bring Python, SQL, scripting, troubleshooting, and a demonstrated habit of identifying repeatable process improvements while rapidly learning IBM Z and z/OS tooling.

I would welcome the opportunity to contribute to CIBC Technology Operations. Thank you for considering my application.

Sincerely,

Mandeep Singh
