Hiring Team
Ciena (AI & Automation)
Ottawa, ON

Re: AI & Automation Intern - GCN Services Business Operations

Dear Hiring Team,

I am writing to apply for the AI & Automation Intern position with Ciena's GCN Services Business Operations team. The opportunity to translate operational needs into practical AI-enabled workflows strongly matches the work I have been doing across production software and municipal systems.

At InferenceSaver, I co-founded a production AI API gateway serving 129 users and built the model integrations, backend workflows, and product interfaces behind it. At BecomeAfish, I automated eight operational workflows spanning payroll, reconciliation, and notifications and built analytics and AI-assisted content tooling.

As a Systems Analyst Intern with the City of Merritt, I manage real support and access-management workflows and created a CityWide REST API runbook through hands-on testing. That mix of scripting, process analysis, documentation, and stakeholder support would help me contribute to Ciena's Power Platform and Copilot initiatives.

I would welcome the opportunity to help Ciena reduce manual effort and improve operational reporting through thoughtful automation. Thank you for considering my application.

Sincerely,

Mandeep Singh
