Re: Data Quality Intern (Winter 2027)

Dear Hiring Team,

I am writing to apply for the Data Quality Intern position at GoMaterials. I enjoy the detailed work of finding inconsistencies, understanding their operational impact, and building repeatable processes that keep data trustworthy as a product grows.

At BecomeAfish, I built a PostgreSQL-backed booking and payments platform supporting 108 accounts and 133 lessons, including reconciliation, payroll batching, campaign attribution, and analytics. That work requires validating records across workflows and investigating missing, duplicate, or mismatched data before it reaches customers or financial reports.

At the City of Merritt, I manage ticket, account, and equipment information and document operational procedures. At InferenceSaver, I diagnosed production payment inconsistencies and implemented safer writes. I would bring strong spreadsheet, SQL, database, and communication skills to supplier inventory cleanup and imports.

I would welcome the opportunity to contribute to clean, dependable data at GoMaterials. Thank you for considering my application.

Sincerely,

Mandeep Singh
