Hiring Team
Highland Valley Copper (Digital Systems)
Logan Lake, BC

Re: Digital Systems Co-op Student (Winter 2027)

Dear Hiring Team,

I am writing to apply for the Digital Systems Co-op Student position at Highland Valley Copper. Based nearby in Kamloops and currently supporting municipal technology in Merritt, I am excited by the opportunity to contribute to a large operational environment in the Thompson-Nicola region.

As a Systems Analyst Intern with the City of Merritt, I have managed 163 assigned IT tickets spanning Windows troubleshooting, applications, access management, hardware, device deployment, and employee onboarding and offboarding. I also created a CityWide REST API runbook through direct curl and PowerShell testing.

My production software work at BecomeAfish and InferenceSaver adds experience with APIs, cloud services, authentication, databases, and disciplined incident diagnosis. Together, these experiences prepare me to support users across office, operational, and remote environments while maintaining strong service and documentation standards.

I would welcome the opportunity to support HVC's digital systems team and learn within an active mining operation. Thank you for considering my application.

Sincerely,

Mandeep Singh
