Hiring Team
Hitachi Rail (Quality Assurance)
Toronto, ON

Re: Quality Assurance Intern (Winter 2027, 12 months)

Dear Hiring Team,

I am writing to apply for the Quality Assurance Intern position at Hitachi Rail. The chance to improve processes and product quality within safety-conscious urban transit is a strong fit for my combination of software and operational support experience.

At InferenceSaver, I diagnosed a payment idempotency defect affecting live transactions, traced the failure across production workflows, and implemented retry-safe writes. Across InferenceSaver and BecomeAfish, I use automated testing, CI/CD, logs, and structured verification to ship changes without disrupting customers.

At the City of Merritt, I have handled 163 assigned IT tickets and documented repeatable API and onboarding procedures. This work has made me careful about evidence, traceability, clear communication, and turning recurring issues into better processes rather than one-off fixes.

I would welcome the opportunity to bring that quality-focused mindset to Hitachi Rail. Thank you for considering my application.

Sincerely,

Mandeep Singh
