Hiring Team
Magnet Forensics
Waterloo / Ottawa, ON

Re: Software Developer Co-op (Winter 2027)

Dear Hiring Team,

I am writing to apply for the Software Developer Co-op position at Magnet Forensics. I am motivated by the chance to join a development team where student code reaches production and supports investigators protecting people, organizations, and communities.

At InferenceSaver and BecomeAfish, I have taken ownership of production features across TypeScript, JavaScript, Python, APIs, databases, authentication, payments, and React interfaces. I have worked through bugs in unfamiliar workflows, diagnosed failures affecting customers, and shipped fixes with automated testing and CI/CD.

My City of Merritt role has further developed my accountability and communication: I manage support cases across departments and document systems so others can work from clear, repeatable guidance. I would bring that ownership mindset and a strong foundation in object-oriented programming to Magnet's codebase.

I would welcome the opportunity to contribute useful production code while learning from Magnet Forensics' development team. Thank you for considering my application.

Sincerely,

Mandeep Singh
