Hiring Team
Ross Video (Cloud Provisioning)
Nepean, ON

Re: Software Developer Co-op - Cloud Provisioning (Winter 2027)

Dear Hiring Team,

I am writing to apply for Ross Video's Software Developer Co-op in Cloud Provisioning. The Ross Platform Manager's focus on licensing, orchestration, role-based access, and a modern React interface closely matches systems I have already built and operated.

At BecomeAfish, I built a production Next.js, React, TypeScript, and PostgreSQL platform with role-based portals, Stripe webhooks, and eight automated operational workflows. At InferenceSaver, I built authentication, billing, affiliate, and model-integration workflows for a production AI gateway serving 129 users.

These projects required API design, RBAC, cloud deployment, iterative debugging, and collaboration around real user needs. My municipal systems internship further strengthened my enterprise troubleshooting and documentation skills.

I would welcome the opportunity to help modernize Ross Platform Manager while growing within an Agile product team. Thank you for considering my application.

Sincerely,

Mandeep Singh
