Hiring Team
Ross Video (C++ Developer)
Nepean, ON

Re: Software Developer Co-op - C++ (Winter 2027)

Dear Hiring Team,

I am writing to apply for Ross Video's C++ Software Developer Co-op. I am excited by the opportunity to work close to high-performance broadcast products and build features that customers use in demanding live environments.

Across InferenceSaver and BecomeAfish, I have built and debugged production software end to end, from APIs and asynchronous workflows to React interfaces and Linux-hosted services. I diagnosed a transaction idempotency defect across a live system and implemented a durable fix, experience that strengthened my approach to state, correctness, and testable code.

My coursework and projects give me a foundation in object-oriented programming, operating systems, networks, Git, CI/CD, and automated testing. I am ready to deepen my C++ and Unix tooling skills while contributing a proven ability to learn unfamiliar systems quickly.

I would welcome the opportunity to contribute to Ross Video's switcher development team. Thank you for considering my application.

Sincerely,

Mandeep Singh
