Hiring Team
Ross Video (Test Automation)
Kanata, ON

Re: Test Automation & Software Developer Co-op (Winter 2027)

Dear Hiring Team,

I am writing to apply for Ross Video's Test Automation and Software Developer Co-op. I am drawn to the chance to work alongside product engineers, understand live audio and video systems deeply, and build reusable automation that improves quality for years rather than one-off scripts.

At InferenceSaver, I diagnosed a production payment defect across asynchronous workflows and implemented retry-safe writes, then restored integrations used for 88 production generation jobs. At BecomeAfish, I maintain automated checks and CI/CD around a platform handling bookings, payments, and operational workflows.

My experience spans Python, JavaScript, TypeScript, APIs, Linux, GitHub, logs, and methodical defect reproduction. At the City of Merritt, I also document repeatable technical procedures and troubleshoot user-facing issues under real operational constraints.

I would welcome the opportunity to contribute automation code, debugging discipline, and a strong quality mindset to Ross Video's Edge Technologies team. Thank you for considering my application.

Sincerely,

Mandeep Singh
