Hiring Team
Teck (Data Governance Business Analyst)
Vancouver, BC

Re: Business Analyst Co-op, Data Governance (Winter 2027)

Dear Hiring Team,

I am writing to apply for Teck's Business Analyst Co-op in Data Governance. The opportunity to translate business needs into practical governance and data-operations improvements closely matches my systems work in municipal government and my experience building data-backed products.

At the City of Merritt, I support users across departments, manage access and onboarding workflows, and created a CityWide REST API runbook that documents authentication, system constraints, and operational procedures. This has required careful requirements discovery, stakeholder communication, and documentation that others can act on.

At BecomeAfish and InferenceSaver, I designed PostgreSQL and Convex-backed workflows, analytics, role-based access, and reliable payment processes. I understand that useful governance must improve data quality and accountability without losing sight of how teams actually work.

I would welcome the opportunity to contribute analytical, technical, and communication skills to Teck's Govern and Operate team. Thank you for considering my application.

Sincerely,

Mandeep Singh
