Hiring Team
Teck (Data Protection Operations)
Vancouver, BC

Re: Data Protection Operations Co-op (Winter 2027)

Dear Hiring Team,

I am writing to apply for Teck's Data Protection Operations Co-op. I am drawn to the hands-on focus on Microsoft Purview, DLP, sensitivity labeling, reporting, and governance across Security, Privacy, and IT teams.

At the City of Merritt, I support Microsoft 365 and Windows environments and have handled 87 onboarding and offboarding tickets involving accounts, permissions, and equipment. This work demands care with access, sensitive information, repeatable evidence, and clear escalation when controls or processes do not behave as expected.

My software work adds PowerShell, Python, API, database, RBAC, OAuth, scheduled-job, and automated reporting experience. I have also diagnosed production defects and converted repeated operational work into documented, reliable workflows.

I would welcome the opportunity to help Teck improve visibility into data-protection controls while reducing administrative effort through automation. Thank you for considering my application.

Sincerely,

Mandeep Singh
