Hiring Team
CIBC (Capital Markets Application Developer)
Toronto, ON

Re: Application/Software Developer Co-op (Winter 2027), Capital Markets Technology

Dear Hiring Team,

I am writing to apply for the Application/Software Developer Co-op with CIBC Capital Markets Technology. I am drawn to the opportunity to develop, test, and support banking applications while working with technical and business stakeholders.

At BecomeAfish, I built a production TypeScript and PostgreSQL platform with role-based portals, Stripe integrations, and eight automated workflows. At InferenceSaver, I built authentication, billing, model integrations, and backend workflows for 129 users and resolved a payment idempotency defect affecting live transactions.

These experiences required translating requirements into tested implementations, debugging across systems, protecting data integrity, and communicating design decisions. My City of Merritt internship adds enterprise support and documentation experience across many departments.

I would welcome the opportunity to bring production ownership and a client-focused engineering approach to CIBC Capital Markets Technology. Thank you for considering my application.

Sincerely,

Mandeep Singh
