Hiring Team
CIBC (Enterprise Technology Application Developer)
Toronto, ON

Re: Application/Software Developer Co-op (Winter 2027), Enterprise Technology & Business Management

Dear Hiring Team,

I am writing to apply for the Application/Software Developer Co-op with CIBC Enterprise Technology and Business Management. The role's mix of programming, testing, systems integration, and stakeholder coordination closely fits my software and enterprise support background.

At BecomeAfish, I built and launched a production Next.js, TypeScript, and PostgreSQL platform supporting 108 accounts and automated eight workflows. I worked from operational needs through implementation, testing, deployment, and ongoing support.

At the City of Merritt, I manage application, access, and device issues across departments and created a tested REST API runbook. At InferenceSaver, I operate production authentication, payment, and AI workflows, including diagnosing and correcting a live data-integrity defect.

I would welcome the opportunity to contribute adaptable development skills and an operations-aware perspective to CIBC's enterprise technology team. Thank you for considering my application.

Sincerely,

Mandeep Singh
