Hiring Team
Ciena (Wavelogic Embedded Software)
Ottawa, ON

Re: Wavelogic Embedded Software Developer Intern (Winter 2027)

Dear Hiring Team,

I am writing to apply for Ciena's Wavelogic Embedded Software Developer Internship. I am drawn to the combination of C/C++, Python, networking protocols, debugging, graphical interfaces, and rigorous system testing behind high-performance telecommunications products.

Across InferenceSaver and BecomeAfish, I have built and debugged production software spanning Python and TypeScript services, React interfaces, APIs, Linux deployments, databases, and automated tests. I have traced failures across live workflows and implemented correctness-focused fixes.

My coursework in networks and operating systems and my City of Merritt systems role provide practical grounding in TCP/IP, hardware, troubleshooting, Git, and technical documentation. I am eager to deepen my embedded C/C++ and hardware-debugging skills in a product environment.

I would welcome the opportunity to contribute strong software fundamentals and a methodical debugging approach to Ciena's Wavelogic team. Thank you for considering my application.

Sincerely,

Mandeep Singh
