Hiring Team
Interac (Cloud Operations)
Toronto, ON

Re: Cloud Operations Intern

Dear Hiring Team,

I am writing to apply for the Cloud Operations Internship at Interac. Supporting cloud services behind payments Canadians use every day strongly appeals to me because my experience combines production infrastructure, automation, financial workflows, and enterprise operations.

At InferenceSaver and BecomeAfish, I deploy and operate cloud-hosted applications with CI/CD, scheduled jobs, APIs, databases, monitoring, and Stripe payment workflows. I diagnosed a production idempotency failure affecting live transactions and implemented retry-safe writes.

At the City of Merritt, I troubleshoot Windows, application, identity, and hardware issues and document repeatable operational procedures. I bring Python and PowerShell scripting, Docker, Linux, logs, access management, and an eagerness to deepen my AWS, Terraform, and FinOps skills.

I would welcome the opportunity to help Interac improve cloud reliability and reduce manual work through automation. Thank you for considering my application.

Sincerely,

Mandeep Singh
