Hiring Team
Solink (Agents)
Remote, Canada / Ottawa, ON

Re: Software Engineer Co-op, Agents

Dear Hiring Team,

I am writing to apply for the Software Engineer Co-op on Solink's Agents team. The role's TypeScript, React, Node.js, REST API, cloud, and AI-first focus is unusually close to the production systems I work on every day.

At InferenceSaver, I co-founded an AI API gateway serving 129 users and built TypeScript interfaces, backend workflows, authentication, payments, and integrations spanning language, image, video, music, and voice models. I also contribute to AgentMemory, an open-source memory layer for AI coding agents.

At BecomeAfish, I own a React and PostgreSQL product with role-based portals and eight automated operational workflows. These projects have trained me to move independently, ask precise questions, test carefully, and take ownership from design through production support.

I would welcome the opportunity to help Solink build agent-powered product features with urgency and quality. Thank you for considering my application.

Sincerely,

Mandeep Singh
