Hiring Team
Solink (Apps)
Ottawa, ON

Re: Software Engineer Co-op, Apps

Dear Hiring Team,

I am writing to apply for the Software Engineer Co-op on Solink's Apps team. I am excited by the opportunity to contribute across the front end and back end of a cloud platform that turns video into useful operational insight.

At BecomeAfish, I built a production Next.js, TypeScript, React, and PostgreSQL platform with role-based portals, payments, geographic matching, and eight automated workflows. At InferenceSaver, I built product interfaces, APIs, authentication, billing, and AI-model integrations for 129 users.

I am comfortable taking a feature from requirements through implementation, testing, review, documentation, and support. My City of Merritt internship further developed my ability to troubleshoot carefully and communicate technical details to different stakeholders.

I would welcome the opportunity to contribute full-stack ownership and a strong quality mindset to Solink's Core Applications and Data team. Thank you for considering my application.

Sincerely,

Mandeep Singh
