Hiring Team
AMD
Vancouver, BC

Re: Software Engineer Intern/Co-op

Dear Hiring Team,

I am writing to apply for the Software Engineer Intern/Co-op position at AMD. As a third-year Computing Science co-op student at Thompson Rivers University, I bring a strong software engineering foundation built through both academic coursework and hands-on production experience, and I am excited about the opportunity to contribute to AMD's engineering teams.

As Co-Founder and Technical Lead at BecomeAfish, I engineered backend workflows and automation at production scale, including payroll batching, reconciliation, and webhook-driven integrations. At InferenceSaver, I worked on a production AI API gateway, diagnosing a payment idempotency defect and implementing retry-safe writes — the kind of precise, systems-level debugging that translates directly to performance- and correctness-critical software.

My internship with the City of Merritt further developed my technical troubleshooting skills, where I documented a full REST API runbook through direct testing and resolved 135 of 163 assigned IT tickets. I bring strong fundamentals in TypeScript, Python, Rust, and SQL, along with genuine curiosity about how software performs at scale.

I would welcome the opportunity to discuss how my background could contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
