Remarcable
Vancouver, BC

Re: Full Stack Developer Co-op

Dear Hiring Team,

I am writing to apply for the Full Stack Developer Co-op position at Remarcable. As a third-year Computing Science co-op student, I have already been operating as a full-stack developer in production — co-founding and building two live platforms end-to-end — and I am excited by the opportunity to bring that same ownership to Remarcable.

At BecomeAfish, I built and launched a booking and payments platform from scratch with Next.js, TypeScript, and PostgreSQL, supporting 108 registered accounts and processing nearly CAD \$5K within two months of launch, including geographic matching logic, role-based portals, and automated payroll workflows. At InferenceSaver, I worked across the full stack of a production AI API gateway, building interfaces, backend workflows, authentication, and payments for 129 registered users.

My internship with the City of Merritt rounded out my experience with real-world technical support and API documentation work, managing 163 IT tickets and building a full REST API runbook. I bring a genuine full-stack skill set and the initiative of someone who has already shipped and operated real software products.

I would welcome the opportunity to discuss how my full-stack development experience can contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
