Hiring Team
General Dynamics Mission Systems–Canada
Calgary, AB

Re: Co-op Winter 2027 - Software Engineering (TacCIS Solutions)

Dear Hiring Team,

I am writing to apply for the Co-op Winter 2027 - Software Engineering (TacCIS Solutions) position at General Dynamics Mission Systems–Canada. As a third-year Computing Science co-op student at Thompson Rivers University, I bring a strong software engineering foundation and a track record of building and shipping reliable, production-grade systems, and I am drawn to the precision and reliability that mission-critical systems demand.

Through BecomeAfish and InferenceSaver, I have built and maintained backend systems that must behave correctly and consistently under real usage: automated payroll and reconciliation workflows, webhook-driven integrations, and payment processing where I diagnosed and fixed an idempotency defect affecting live transactions. This correctness-focused, systems-level thinking is directly transferable to defense and tactical communications software.

My internship with the City of Merritt further developed my ability to work methodically through complex technical systems, including documenting a full REST API runbook through direct testing and managing 163 IT tickets. I bring a disciplined, detail-oriented approach well suited to safety- and mission-critical engineering environments.

I would welcome the opportunity to discuss how my software engineering background could contribute to the TacCIS Solutions team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
