Hiring Team
QuadReal Property Group
Vancouver, BC

Re: Integration Developer, Winter 2027 (Co-op/Internship)

Dear Hiring Team,

I am excited to apply for the Integration Developer, Winter 2027 (Co-op/Internship) position at QuadReal Property Group. As a third-year Computing Science co-op student, I bring hands-on experience building and integrating production systems, and I am drawn to the opportunity to apply that experience to enterprise systems integration.

At BecomeAfish, I engineered geographic instructor matching, role-based portals, and Stripe webhooks, and automated 8 workflows covering payroll batching, reconciliation, and notifications — directly relevant integration and automation experience. At InferenceSaver, I built model integrations across multiple third-party AI providers, normalizing request/response handling and authentication across each one, plus billing and affiliate systems.

My internship with the City of Merritt gave me additional grounding in enterprise systems integration: I documented a full CityWide REST API runbook through hands-on curl and PowerShell testing, and managed 163 IT tickets spanning access management and application support.

I would welcome the opportunity to discuss how my integration and full-stack development experience can contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
