Hiring Team
SECURE
Calgary, AB

Re: Software Developer - Intern

Dear Hiring Team,

I am writing to apply for the Software Developer - Intern position at SECURE. As a third-year Computing Science co-op student at Thompson Rivers University, I bring hands-on experience building production software and supporting real operational systems, and I am drawn to SECURE's role in waste and environmental services infrastructure.

My internship as Systems Analyst Intern with the City of Merritt gave me direct experience supporting operational IT systems: I managed 163 assigned IT tickets, handled 87 onboarding/offboarding cases, and documented a full REST API runbook through hands-on curl and PowerShell testing — experience directly relevant to supporting an organization with distributed, real-world operations.

As Co-Founder and Technical Lead at BecomeAfish, I built a full booking and payments platform from scratch, and at InferenceSaver I worked across the stack of a production AI API gateway, including diagnosing and fixing a payment-processing defect affecting live transactions. Between my operational IT background and full-stack development experience, I bring a practical, detail-oriented approach to software development.

I would welcome the opportunity to discuss how my background can contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
