Hiring Team
Cohere (Machine Learning)
Remote, Canada

Re: Machine Learning Intern/Co-op (Winter 2027)

Dear Hiring Team,

I am writing to apply for Cohere's Machine Learning Intern/Co-op position for Winter 2027. I am excited by the opportunity to improve language models, training and serving workflows, and applied NLP products while learning from Cohere's machine learning team.

At InferenceSaver, I co-founded a production AI gateway and multimodal platform that reached 2.7K active site users and 43K tracked events in 2026. I implemented integrations and reliable product workflows across language, image, video, music, and voice models, strengthening my understanding of model behaviour and production constraints.

I contributed tested integrations to AgentMemory, an open-source semantic memory layer for AI agents, and built Preflight, a multimodal evaluation tool combining source context, DOM evidence, and responsive screenshots. These projects developed my Python and TypeScript engineering, evaluation, experimental debugging, and technical communication skills.

I would welcome the opportunity to bring applied AI experience, strong engineering ownership, and a rigorous learning mindset to Cohere's model-development work. Thank you for considering my application.

Sincerely,

Mandeep Singh
