Hiring Team
Amazon (Systems Development Engineer)
Vancouver, BC

Re: Systems Development Engineer Intern, Canada 2027

Dear Hiring Team,

I am writing to apply for the Systems Development Engineer Intern, Canada 2027 position at Amazon. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to work on systems engineering at Amazon's scale.

As Systems Analyst Intern with the City of Merritt, I've managed 163 assigned IT tickets, with 135 completed, spanning Windows troubleshooting, application support, access management, and hardware, and built a full CityWide REST API runbook through hands-on curl and PowerShell testing, documenting authentication, API constraints, and operational workflows.

At BecomeAfish and InferenceSaver, I've built and operated production software platforms end to end, including backend infrastructure, automated workflows, and payment systems, giving me a well-rounded foundation across systems and software engineering.

I would welcome the opportunity to discuss how my systems and engineering background could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
