Hiring Team
Apera AI (Cloud Infrastructure)
Vancouver, BC

Re: Software Developer (Cloud Infrastructure) - Co-Op

Dear Hiring Team,

I am writing to apply for the Software Developer (Cloud Infrastructure) - Co-Op position at Apera AI. As a third-year Computing Science co-op student at Thompson Rivers University, I'm excited by the chance to work on the infrastructure behind Apera's 3D vision-guided robotics platform, where reliability and uptime directly affect real manufacturing lines.

As Systems Analyst Intern with the City of Merritt, I built a full CityWide REST API runbook through hands-on curl and PowerShell testing, and managed 163 IT tickets spanning systems support, access management, and hardware deployment.

As Co-Founder of InferenceSaver and BecomeAfish, I've operated backend infrastructure for production platforms handling real payment processing and webhook-driven integrations, including diagnosing and fixing a Stripe webhook idempotency defect affecting live transactions.

I would welcome the opportunity to discuss how my infrastructure and backend experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
