Hiring Team
Apera AI (Full Stack)
Vancouver, BC

Re: Software Developer - Full Stack (Co-op)

Dear Hiring Team,

I am writing to apply for the Software Developer - Full Stack (Co-op) position at Apera AI. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to Apera's work bringing 3D vision-guided robotics to real manufacturing floors, and I'd like to bring my full-stack experience to a team building software that has to work reliably in the physical world.

As Co-Founder of BecomeAfish and InferenceSaver, I've built and operated full-stack production platforms end to end, from frontend interfaces through backend APIs, database design, and payment integrations, with InferenceSaver processing \$5.6K+ across 129 registered users. I personally diagnosed and fixed a Stripe webhook idempotency defect that had silently under-credited 8 of 14 checkouts, the kind of correctness bug that only surfaces under real usage.

My internship with the City of Merritt added enterprise-systems grounding: documenting REST API workflows and supporting a large user base's IT needs directly.

I would welcome the opportunity to discuss how my full-stack experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
