Hiring Team
Corpay
Vancouver, BC

Re: Software Developer (Co-op)

Dear Hiring Team,

I am writing to apply for the Software Developer (Co-op) position at Corpay. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to Corpay's work in global payments, an area I already have hands-on, real-stakes experience in.

As Co-Founder of InferenceSaver and BecomeAfish, I've built and operated production platforms handling real payment processing, with InferenceSaver processing \$5.6K+ across 129 registered users and BecomeAfish processing CAD \$5K in its first two months. I personally diagnosed and fixed a Stripe webhook idempotency defect that had silently under-credited 8 of 14 checkouts, experience directly relevant to building payment systems that have to be correct every time.

My internship with the City of Merritt added enterprise IT grounding: managing 163 tickets and documenting a full REST API runbook through hands-on testing.

I would welcome the opportunity to discuss how my payments and full-stack experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
