## Re: 2027 Winter Co-Ops - Software Development

Dear Hiring Team,

I am writing to apply for the 2027 Winter Co-Ops - Software Development position at Demonware. As a third-year Computing Science co-op student at Thompson Rivers University, I'm excited by the chance to work on backend infrastructure that has to hold up at the scale of live, always-on games.

As Co-Founder of InferenceSaver, I've built and operated backend systems handling real-time API traffic and payment processing for 129 registered users, and personally diagnosed and fixed a Stripe webhook idempotency defect that had silently under-credited 8 of 14 checkouts, the kind of subtle correctness bug that only shows up under real concurrent load.

My internship with the City of Merritt further developed my systems fundamentals, including building a full REST API runbook through hands-on testing and managing 163 IT tickets across a large user base.

I would welcome the opportunity to discuss how my backend and systems experience could contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

**Mandeep Singh**
