BC Hydro
Lower Mainland, BC

Re: Co-op Student - General IT, Computer, Data and Analytics

Dear Hiring Team,

I am writing to apply for the Co-op Student - General IT, Computer, Data and Analytics position at BC Hydro. As a third-year Computing Science co-op student, I bring direct, hands-on experience supporting enterprise IT systems, and I'm drawn to the opportunity to contribute to an organization as central to BC's infrastructure as BC Hydro.

As Systems Analyst Intern with the City of Merritt, I managed 163 assigned IT tickets, with 135 completed, spanning Windows troubleshooting, application support, access management, and hardware, and developed a full CityWide REST API runbook through hands-on curl and PowerShell testing. I also handled 87 onboarding/offboarding-related tickets covering employee accounts, permissions, and equipment provisioning.

At InferenceSaver, I worked with real usage data and analytics tracking to understand platform behavior across 129 registered users, and at BecomeAfish I implemented analytics tracking covering thousands of pageviews, giving me practical experience turning raw data into useful operational insight.

I would welcome the opportunity to discuss how my background can contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
