Hiring Team
BMO
Toronto, ON

Re: Software Developer, Winter 2027 (Co-op/Internship) - 4 Months

Dear Hiring Team,

I am writing to apply for the Software Developer, Winter 2027 (Co-op/Internship) position at BMO. As a third-year Computing Science co-op student at Thompson Rivers University, I have spent the past year building and shipping full-stack production software, from payments infrastructure to AI-powered platforms, and I would welcome the chance to bring that experience to BMO's technology teams.

As Co-Founder and Technical Lead at BecomeAfish, I built a booking and payments platform from the ground up using Next.js, TypeScript, and PostgreSQL, handling everything from database design to Stripe webhook integrations and automated reconciliation workflows. At InferenceSaver, I co-developed a production AI API gateway serving 129 registered users, including diagnosing and fixing a payment-processing idempotency defect, exactly the kind of careful, data-integrity-minded engineering that matters in financial software.

My internship with the City of Merritt gave me additional grounding in enterprise systems: I documented REST API workflows, managed IT tickets across a large user base, and worked directly with access management and identity systems.

I would welcome the opportunity to discuss how my full-stack and backend experience can contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
