Re: Student Researcher, BS/MS, Winter-Summer 2027

Dear Hiring Team,

I am writing to apply for the Student Researcher, BS/MS, Winter-Summer 2027 position at Google. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to contribute to research at the scale and rigor Google is known for.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including model integration and diagnosing a subtle Stripe webhook idempotency defect. I'm also an early contributor to AgentMemory, an open-source agentic memory project with 28,275+ GitHub stars.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my applied AI and research-adjacent experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
