TC Energy
Calgary, AB

Re: Student Intern, Computer Science

Dear Hiring Team,

I am writing to apply for the Student Intern, Computer Science position at TC Energy. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to apply computer science skills to critical energy infrastructure at national scale.

As Systems Analyst Intern with the City of Merritt, I managed 163 IT tickets spanning systems support and access management, and built a full CityWide REST API runbook through hands-on curl and PowerShell testing.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including diagnosing a Stripe webhook idempotency defect.

I would welcome the opportunity to discuss how my computer science and systems experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
