Re: AI Compiler Software Intern (PEY)

Dear Hiring Team,

I am writing to apply for the AI Compiler Software Intern (PEY) position at Tenstorrent. As a third-year Computing Science co-op student at Thompson Rivers University in a co-op program structured similarly to a PEY-style extended internship, I'm drawn to the chance to work on AI compiler infrastructure at a company building next-generation AI hardware.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including model integration and diagnosing a subtle Stripe webhook idempotency defect.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my applied AI experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
