Hiring Team
IBM (AI/ML Developer, IPC)
Toronto, ON

Re: IPC AI/ML Developer Intern (January 2027 - 12 Months - Toronto)

Dear Hiring Team,

I am writing to apply for the IPC AI/ML Developer Intern (January 2027 - 12 Months - Toronto) position at IBM. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the 12-month term as a chance to build real depth on one team.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including model integration, API design, and diagnosing a Stripe webhook idempotency defect.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my applied AI/ML experience could contribute to your team over this longer term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
