Hiring Team
M31 AI (Quantum Computing)
Toronto, ON

Re: Quantum Computing Research Intern

Dear Hiring Team,

I am writing to apply for the Quantum Computing Research Intern position at M31 AI. As a third-year Computing Science co-op student at Thompson Rivers University, I'm genuinely drawn to quantum computing as a field I'm actively looking to grow into, building on a strong software engineering and applied-AI foundation.

As Co-Founder of InferenceSaver, I've built and operated a live AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including model integration and diagnosing a subtle Stripe webhook idempotency defect, experience that reflects the same rigor research work demands.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my engineering foundation and genuine interest in the field could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
