Vancouver, BC

Re: AI Product Engineer

Dear Hiring Team,

I am writing to apply for the AI Product Engineer position at Match Group. As a third-year Computing Science co-op student at Thompson Rivers University, I'm excited by the chance to build AI-powered product experiences at consumer scale, in Vancouver.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform from the ground up, serving 129 registered users and processing \$5.6K+, including model integration, API design, and product-facing feature work.

As Co-Founder of BecomeAfish, I've also shipped a second consumer-facing production platform, processing CAD \$5K in its first two months, giving me direct experience with what it takes to ship AI product features real users actually pay for.

I would welcome the opportunity to discuss how my AI product experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
