Hiring Team
Sun Life (Cloud Infrastructure)
Toronto, ON

Re: Student, Cloud Infrastructure Analyst (Winter 2027)

Dear Hiring Team,

I am writing to apply for the Student, Cloud Infrastructure Analyst (Winter 2027) position at Sun Life. As a third-year Computing Science co-op student at Thompson Rivers University, I'm excited by the chance to build infrastructure that supports real financial decisions at scale.

As Systems Analyst Intern with the City of Merritt, I built a full CityWide REST API runbook through hands-on curl and PowerShell testing, and managed 163 IT tickets spanning systems support and infrastructure.

As Co-Founder of InferenceSaver and BecomeAfish, I've operated backend and cloud infrastructure (Vercel, Docker, CI/CD) for production platforms handling real payment processing, including diagnosing and fixing a Stripe webhook idempotency defect affecting live transactions.

I would welcome the opportunity to discuss how my infrastructure experience could contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
