Re: Software Engineer Intern (Summer 2027)

Dear Hiring Team,

I am writing to apply for the Software Engineer Intern position at Khan Academy for Summer 2027. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the mission of free, high-quality education for anyone, anywhere, and to the chance to build software that directly serves learners.

At BecomeAfish, I built and launched a production booking and payments platform on Next.js, TypeScript, and PostgreSQL, supporting 108 registered accounts and 133 scheduled lessons, and engineered role-based portals serving different user types with different needs.

At InferenceSaver, I co-founded and operated a production AI API gateway for 129 registered users, and I'm an open source contributor to AgentMemory, a persistent memory layer for AI coding agents that has grown to 28,275+ GitHub stars.

I would welcome the opportunity to discuss how my hands-on full-stack experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
