Re: Software Developer Co-op, Web/Cloud Application

Dear Hiring Team,

I am writing to apply for the Software Developer Co-op, Web/Cloud Application position at Semtech. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to build cloud-deployed web applications for a semiconductor company here in BC.

At BecomeAfish, I built and launched a production booking and payments platform on Next.js and PostgreSQL, deployed on Vercel, supporting 108 registered accounts and 133 scheduled lessons, and automated eight operational workflows end to end.

At InferenceSaver, I co-founded and operated a production AI API gateway's web application and backend workflows for 129 registered users, direct experience with the full web/cloud application lifecycle from interface to infrastructure.

I would welcome the opportunity to discuss how my hands-on web and cloud application experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
