Summary

Third-year Computing Science co-op student with production AI product, TypeScript, React, Python, REST API, cloud, and database experience. Seeking HeyGen's Winter 2027 Software Engineering Internship to build impactful AI features across the stack.

Education

Thompson Rivers University Kamloops, BC

Bachelor of Computing Science (Co-op Program) *2023 – Present*

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

Experience

Co-Founder & Software Engineer July 2025 – Present

InferenceSaver *Next.js, React, TypeScript, Convex, Stripe*

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **$5.6K+ in confirmed platform credit allocations across 60 top-ups**
- Diagnosed a Stripe idempotency defect affecting **8 of 14 completed checkouts**, implemented retry-safe payment writes, and restored music/voice integrations used for **88 production generation jobs**

Co-Founder & Technical Lead March 2026 – Present

BecomeAfish *Next.js, TypeScript, PostgreSQL, Stripe*

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD $5K within 2 months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **8 workflows** covering payroll batching, reconciliation, and notifications
- Built campaign attribution, AI-assisted blog/newsletter automation, social publishing integrations, and technical SEO tooling; implemented analytics tracking **4,967 pageviews over 61 days**

Systems Analyst Intern June 2026 – Present

City of Merritt *Merritt, BC*

- Managed **163 assigned IT tickets**, with **135 completed**, spanning Windows troubleshooting, application support, access management and hardware
- Handled **87 onboarding/offboarding-related tickets** covering employee accounts, permissions and equipment provisioning and collection

Projects

AgentMemory GitHub | Live

Open-Source Contributor *TypeScript, Node.js, MCP, SQLite*

- Worked in a TypeScript codebase spanning session recording, workspace context, and semantic retrieval
- Contributed tested Pi, OpenClaw, and Hermes integration fixes to an AI-agent memory project with 29.7K+ GitHub stars and 2.6K+ forks

Preflight GitHub | Live

Hackathon Developer *Next.js, TypeScript, Amazon Nova, Playwright*

- Built a multimodal launch scanner combining source-code context, DOM audits, and responsive screenshots
- Used Amazon Nova models to identify visual, routing, and performance issues and produce remediation checklists

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS
Frameworks: Next.js, React, Node.js, Prisma
Backend & Data: Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication
Cloud & Development: Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs
Platforms & Integrations: Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4
IT Systems: Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
